### Fund Objective

The Herald Worldwide Technology Fund (HWTF) is an Open Ended Investment Company (OEIC) that seeks to achieve capital growth, in excess of the average, by investing in quoted companies in the technology, communications and multi-media sectors. As its name suggests, the Fund invests in companies worldwide, but especially North America and the UK.

### Fund Manager Comment

#### Performance in the month

Another strong month. As expected, the parallels made in Q4 for a technology correction like 2000 were misplaced on fundamentals which are still strong. The US element of the fund returned 6.2%, and the UK appreciated 6.4% leading the way. Mimecast pleased the market, rising 27.1% in the month. It has seemed much more attractive than Proofpoint, which also provides cloud based email security, and makes material losses. Xilinx has continued to be strong with success in the datacentre and 5G is a big opportunity. Cadence, Microsoft and Mellanox were also positive. The Asian portfolio returned 3.5%. Europe was the laggard declining 2.6%, with United Internet which has performed well in the long run, but is now challenged.
